

## Project Demo Planning

|                      |                                                         |
|----------------------|---------------------------------------------------------|
| <b>Date</b>          | 11 July 2026                                            |
| <b>Team ID</b>       |                                                         |
| <b>Project Name</b>  | Rising waters - Flood Prediction using Machine Learning |
| <b>Maximum Marks</b> | 1 Mark                                                  |

### Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

| S.No | Demo Section              | Description                                                | Duration (mins) | Responsible Member                 |
|------|---------------------------|------------------------------------------------------------|-----------------|------------------------------------|
| 1    | Introduction              | Introduce the project, objective, and problem statement    | 2               | P Venkata Rajesh Kumar (Team Lead) |
| 2    | System Architecture       | Explain the ML model, Flask backend, and overall workflow  | 3               | Alandhur Rajashekar Thulasidhar    |
| 3    | Live Demonstration        | Enter weather parameters and show flood prediction results | 4               | Jahnavi Nukkanaboyina              |
| 4    | Dataset & Model           | Explain dataset, preprocessing, and Random Forest model    | 2               | Alandhur Rajashekar Thulasidhar    |
| 5    | Testing & Results         | Show prediction accuracy, screenshots, and performance     | 2               | S Gopi Kiran                       |
| 6    | Conclusion & Future Scope | Summarize the project and discuss future improvements      | 2               | Mandi Dinesh                       |

### Demo Flow Summary:

| Step | Activity                         | Notes                                                                                         |
|------|----------------------------------|-----------------------------------------------------------------------------------------------|
| 1    | Introduction & Problem Statement | Explain why flood prediction is important and project objectives                              |
| 2    | Solution Overview                | Describe system architecture, technologies used, and ML workflow                              |
| 3    | Live Feature Demonstration       | Launch the Flask application, enter sample weather values, and display the prediction result. |
| 4    | Q&A Session                      | Answer evaluator questions and explain future enhancements.                                   |
