

Customer Journey Map

Date	11 July 2026
Team ID	
Project Name	Rising waters - Flood Prediction using Machine Learning
Maximum Marks	2 Marks

Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1	Stage 2	Stage 3
Actions <i>What does the customer do?</i>	•Checks weather conditions • •	•Click predict •Waits for the Result •Reviews the flood risk	•Follows safety instructions •Shares alerts with family •Contacts local authorities if necessary
Touchpoint <i>What part of the service do they interact with?</i>	•Weather reports •Flood Prediction Web Application •Rainfall Dataset	•Machine Learning Model •Prediction Engine •Web Dashboard	•Emergency Services •Government Alerts •Mobile Notifications
Customer Thought <i>What is the customer thinking?</i>	•I hope the prediction is accurate •Is my area at risk? •Can I trust this system?	•How accurate is the Result •Should I Prepare •What Precautions Should I take?	•My family is safe •The Prediction helped me •I made the Right Decision
Customer Feeling <i>What is the customer feeling?</i>	•Curious •Concerned •Hopeful	•Anxious •Focused •Alert	•Relieved •Safe •Confident

Process Ownership <i>Who is in the lead on this?</i>	• User • Weather Data Provider • Flood prediction System	• Machine Learning Model • Prediction System • Flask Backend	• User • Disaster Management Authority • Emergency Response team
Opportunities <i>How can we improve this stage?</i>	• Simplify data entry • Improve user interface • Provide real-time weather Updates	• Reduce Prediction Time • Show confidence score • Explain prediction results	• Send SMS Notification • Provide evacuation routes • Integrate live government alerts
